## **DETAILED ACTION**

### ***Request for Continued Examination***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 18, 2008, has been entered.

Claims 1, 14 and 15 have been amended. Claims 9-12 have been canceled. Therefore, Claims 1-8 and 13-16 are pending in this office action.

### ***Claim Rejections - 35 USC § 112***

2. The rejection of Claims 1-8 and 13-16 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter, has been overcome based on the amendments to the claims.

### ***Claim Rejections - 35 USC § 103***

3. The rejection of Claims 1-8 and 13-16 under 35 U.S.C. 103(a) as being unpatentable over Quist (US 4,410,610) in view of Lund et al. (US 6,309,429 B1), has been overcome based on the amendments to the claims and the arguments presented on pages 6-7 of the Remarks dated November 18, 2008.

***Allowable Subject Matter***

4. Claims 1-8 and 13-16 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The instant claims are to a rechargeable battery having a cover, the rechargeable battery comprising: at least one connecting pole comprising a pole shank inserted into a pole sleeve having an inner surface, the connecting pole being sealably mounted in the cover such that the rechargeable battery is liquid-tight and gas-tight, the pole shank comprising a first section and a second section, wherein the diameter of the first section is smaller than the diameter of the second section; wherein the pole sleeve is electrically conductively connected to the pole shank and is held in a liquid-tight and gas-tight manner by the cover; wherein the first section of the pole shank is electrically conductively connected in a gas-tight and liquid-tight manner to the inner surface of the pole sleeve; and further comprising a sliding element provided between the second section of the pole shank and the inner surface of the pole sleeve such that the inner surface of the pole sleeve is not in contact with the pole shank.

The prior art does not teach the claimed invention. The most pertinent prior art has been presented.

With regard to Claim 1, the closest prior art, Quist (US 4,410,610) and Lund et al. (US 6,309,429 B1), as applied, does not teach or fairly suggest a rechargeable battery having a cover, at least one connecting pole comprising a pole shank inserted into a pole sleeve, the pole shank comprising a first section wherein the diameter of the first

section is smaller than the diameter of a second section, wherein the first section of the pole shank, which is smaller than the second section of the pole shank, is electrically conductively connected to the inner surface of the pole sleeve. The closest prior art also does not teach or fairly suggest a sliding element which is provided between the second section of the pole shank and the inner surface of the pole sleeve such that the inner surface of the pole sleeve is not in contact with the pole shank.

Because the prior art does not disclose the claimed invention or provide teachings that would lead one of ordinary skill in the art at the time the invention was made to find the invention obvious over the prior art, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
